LANGUAGES

- English (Fluent)
- Filipino (Native)

REFERENCE

Available upon request

PROFILE

Full-stack developer with 3+ years of experience building and maintaining production web apps and APIs for international clients on remote teams. I work across Laravel, Vue.js, React and MySQL, with AWS, Docker and CI/CD. I use AI every day, from building AI-powered features on AWS Bedrock to agent-based development with Claude Code and GitHub Copilot.

WORK EXPERIENCE

Full Scale Teams Ph, Inc. 2023 - PRESENT
Software Developer II

- Develop and maintain full-stack web applications and APIs using Laravel, Vue.js, React and MySQL.
- Build third-party integrations and AI-powered features on AWS for US-based clients.
- Optimize performance; ship via Docker, CI/CD and code reviews.

Collabera Technologies Private Limited MAY - SEP 2023
Java Application Developer

- Built RESTful APIs with Java and Spring Boot, secured with Spring Security.
- Applied test-driven development with JUnit and worked with CI/CD pipelines.

Flora National High School 2022 - 2023
Local School Board Teacher

- Taught Java programming and object-oriented concepts to senior high school students.
- Mentored student teams building Android apps with QR code, GPS and attendance tracking.
